Summary

AI Specialist with 5+ years of experience integrating AI solutions into business systems to enhance efficiency and performance. Skilled in machine learning, data science, web development, and system integration. Experienced in team supervision, event operations management, and technical support across diverse industries, combining strong technical capabilities with leadership and problem-solving skills.

Experience

Head of AI & Product Developer

Rowwad Advisory and Business Solutions | 2025 - Present

- Developed core backend services and API architecture for Bayan – AI Paralegal Assistant, designed multi-server infrastructure for application and AI workloads, and implemented LLM pipelines including Retrieval-Augmented Generation (RAG) to enable contextual, document-aware legal query responses.
- Designed and delivered full-stack web platforms, including ERP-integrated systems aligned with client operational requirements.
- Architected and developed proprietary due diligence systems to assess business models, operational risk, and investment feasibility.

LLM Safety & Behavior Steering Intern

Qatar Computing Research Institute | 2025/05 - 2025/08

- Trained and calibrated a neural controller for LLM behavior steering (anti-refusal), iterating on training scripts, configs, and ablations to improve controllability without degrading base performance.
- Built an end-to-end evaluation harness to benchmark refusal/compliance behavior across datasets.

TICKETING TEAM SUPERVISOR

F1 Race Tournament Management | 2024

- Supervised ticketing checkers to ensure smooth entry operations during the tournament, resolving issues in real time and maintaining efficient process flow under live event demands.

TICKETING SUPERVISOR

AFC23 Tournament Management | 2023- 2024

- Managed VIP and public ticket distribution during the Asia Cup, handling customer interactions and resolving issues under pressure while coordinating with teams to ensure smooth live event operations.

TECHNICAL SUPPORT OFFICER

Ideal Solutions | 2022/07 - 2022/12

- Provided technical support for POS systems, diagnosing and resolving software issues while assisting with system setup, configuration, and maintenance to ensure service continuity and customer satisfaction.
- VISA representative during the World Cup period

CUSTOMER SERVICE AGENT

UDST | 2021 - 2022

- Supported customers across multiple communication channels, addressing inquiries, resolving concerns, and delivering prompt, professional solutions to maintain strong customer relationships.

Education

University of Doha for Science and Technology | 2020-2025

Bachelor in Data Science and Artificial Intelligence

Syrian Community School in Qata | 2019

High School Diploma

Skills
